

## Some useful character entities for transcribing an Old Norwegian text

Character	Code point	Entity
þ	00FE	&thorn;
Ʀ	00DE	&THORN;
ð	00F0	&eth;
Ð	00D0	&ETH;
æ	00E6	&aelig;
ǣ	01FD	&aeligacute;
ǽ	A735	&aelig;
ǿ	0119	&eogon;
ø	01EB	&oogon;
ø	00F8	&oslash;
ø	01FF	&oslashacute;
ᵿ	1D0D	&mscap;
ƒ	017F	&stall;
s	A731	&sscap;
ƿ	A769	&vins;

The combination of the ‘ao’ ligature and an accent can be encoded by a precomposed character in the Private Use Area of the Medieval Unicode Font Initiative:

ǽ                    EFE3                    &aeligacute;

Or it can be encoded by two characters in the Official Unicode area:

ǽ + ´ = ǽ            A735 + 0301            &aelig; + &combacut;

For more entities, please see the *MUFI character recommendation*, v. 4.0, *Alphabetical order*, which can be downloaded free of charge at <https://bora.uib.no/handle/1956/10699>
